

1. Tell us more about yourself? Who are you?

I am Haadi Majeed, a Senior in computer engineering from Ankeny, Iowa. I enjoy playing games and hanging out with friends when not working or working on projects.

2. What is your area of study?

I am majoring in computer engineering, learning towards firmware development

3. Why did you choose 314? How did you find out about this class?..... Tell us more about how and why you are in 314, we love having you here.

I learned about the class from a friend and fellow RA in the dorms who took it last fall. He'd would talk about all the fascinating topics which inspired me to take the course myself.

4. What do you think we will be learning in this class? What do you like to learn?

Electromagnetism and how it links to other topics conceptually. I think the topic itself is very interesting and would like to learn anything about it to increase my understanding of the topic.

5. What do you remember from your Electromagnetism? Are these good bad, or ugly memories.

I remember struggling with the actual math behind the topic, but finding the conceptual parts of it very interesting due to how complex it is.
